## Summary of Findings

This survey measured employee agreement on a variety of topics and within several work group classifications. Agreement was measured using a scaling option from Strongly Disagree to Strongly Agree. The survey also included several open-ended items to gather information in the form of suggestions and explanations.

194 respondents completed the questionnaire. Please note however, that not every participant completed every item. Therefore, within these results you may find some items with a higher number of respondents (the 'n'-size) than other items.

Participants were from several different job roles and had a variety of years of service.

## Analysis

The questionnaire items were grouped into 5 dimensions with averages shown in the chart below. The bars are sorted by average score in descending order. The dimensions shown at the bottom of the chart represent those with the greatest need for employee development. The dimensions shown at the top of the chart represent those with the least need for employee development. Level of Agreement is defined as the percentage of respondents that Agree 4 to Strongly Agree 5 with the items in that dimension.

### Average Scores by Dimension

The average score for all dimensions is: 3.85

### Level of Agreement Percentages by Dimension

The average Level of Agreement for all dimensions is: 70%

### Level of Agreement Table

The table below shows the number and percentage of responses selected for each item in this dimension. Responses to items in this dimension were measured using a 5-point scale from "Never " to "Always ". The responses were given values from 1 to 5 where "Never " was scored as a 1 (also shown in red) and "Always " was scored as a 5 (also shown in green). The average score shown in the tables below represents the average response for that item. This table also shows the responses in a more graphic form where the percentage of each kind of response is shown using a color from red to green.

## Agreement By Demographic

The table below shows the responses in a graphic form where the percentage of each kind of response is shown using a color from red (Strongly Disagree) to green (Strongly Agree). The purpose of this graph is to easily compare the different items on this dimension to identify those with a higher or lower level of agreement. This table also includes the level of agreement with each item on this section of the survey. Agreement in this section is defined as a response from "Agree" (4) to "Strongly Agree" (5). The level of agreement as a percentage of all responses is shown below.

### Level of Agreement Table

The table below shows the number and percentage of responses selected for each item in this dimension. Responses to items in this dimension were measured using a 5-point scale from "Never " to "Always ". The responses were given values from 1 to 5 where "Never " was scored as a 1 (also shown in red) and "Always " was scored as a 5 (also shown in green). The average score shown in the tables below represents the average response for that item. This table also shows the responses in a more graphic form where the percentage of each kind of response is shown using a color from red to green.

## Agreement By Demographic

The table below shows the responses in a graphic form where the percentage of each kind of response is shown using a color from red (Strongly Disagree) to green (Strongly Agree). The purpose of this graph is to easily compare the different items on this dimension to identify those with a higher or lower level of agreement. This table also includes the level of agreement with each item on this section of the survey. Agreement in this section is defined as a response from "Agree" (4) to "Strongly Agree" (5). The level of agreement as a percentage of all responses is shown below.

### Level of Agreement Table

The table below shows the number and percentage of responses selected for each item in this dimension. Responses to items in this dimension were measured using a 5-point scale from "Never " to "Always ". The responses were given values from 1 to 5 where "Never " was scored as a 1 (also shown in red) and "Always " was scored as a 5 (also shown in green). The average score shown in the tables below represents the average response for that item. This table also shows the responses in a more graphic form where the percentage of each kind of response is shown using a color from red to green.

## Level of Agreement Table

The table below shows the responses in a graphic form where the percentage of each kind of response is shown using a color from red (Strongly Disagree) to green (Strongly Agree). The purpose of this graph is to easily compare the different items on this dimension to identify those with a higher or lower level of agreement. This table also includes the level of agreement with each item on this section of the survey. Agreement in this section is defined as a response from "Agree" (4) to "Strongly Agree" (5). The level of agreement as a percentage of all responses is shown below.

### Level of Agreement Table

The table below shows the number and percentage of responses selected for each item in this dimension. Responses to items in this dimension were measured using a 5-point scale from "Never " to "Always ". The responses were given values from 1 to 5 where "Never " was scored as a 1 (also shown in red) and "Always " was scored as a 5 (also shown in green). The average score shown in the tables below represents the average response for that item. This table also shows the responses in a more graphic form where the percentage of each kind of response is shown using a color from red to green.

## Level of Agreement Table

The table below shows the responses in a graphic form where the percentage of each kind of response is shown using a color from red (Strongly Disagree) to green (Strongly Agree). The purpose of this graph is to easily compare the different items on this dimension to identify those with a higher or lower level of agreement. This table also includes the level of agreement with each item on this section of the survey. Agreement in this section is defined as a response from "Agree" (4) to "Strongly Agree" (5). The level of agreement as a percentage of all responses is shown below.

Item	n	Avg	LOA	Strongly Disagree 1	Disagree 2	No Opinion 3	Agree 4	Strongly Agree 5

### Level of Agreement Table

The table below shows the number and percentage of responses selected for each item in this dimension. Responses to items in this dimension were measured using a 5-point scale from "Never " to "Always ". The responses were given values from 1 to 5 where "Never " was scored as a 1 (also shown in red) and "Always " was scored as a 5 (also shown in green). The average score shown in the tables below represents the average response for that item. This table also shows the responses in a more graphic form where the percentage of each kind of response is shown using a color from red to green.
