Introduction

What you will find in this report
This report contains the results of the 360-degree feedback collected from a combination of yourself, management, and peers. These results are presented in a variety of formats to help you identify your strengths, areas for development, and areas where your ratings may diverge from those of the individuals providing you feedback. Please recognize the time and effort your respondents put into providing you with this feedback, be open to their opinions, and be willing to use their feedback as a starting point for your learning and development.

Goals of the 360 Degree Feedback

1. Increased mindfulness
2. Greater awareness of the leadership and management competencies the company is seeking to develop
3. Greater clarity about strengths to build on and areas to improve
4. Improved goal-setting for personal and professional development
5. More frequent and open communication between yourself and others about what is working well and what needs to be improved
6. Increased comfort with seeking and receiving feedback
7. Increased comfort with giving feedback

Receiving Feedback
Hearing from others how they perceive you is challenging for everyone, especially if their perceptions are different from your own. Remember that their feedback is as much about them as about you. At the same time, others' perceptions of you form the real basis of your relationships. It is a precious gift to learn from others how they perceive you, for with that information you can begin to improve your relationships and teamwork on a truly solid foundation. Give your emotional responses to the feedback time to evolve and settle down, then begin the process of making sure you understand what others are saying.

What is Feedforward and What to Do with Your Feedforward
Feedforward is the reverse exercise of feedback. It's the process of replacing positive or negative feedback with future-oriented solutions. In simple terms, it means focusing on the future instead of the past.
During the upcoming Leadership sessions, you will have an extended opportunity to work with your coach to interpret your feedback and to begin to prioritize improvements you want to make.

At the end of the sessions, you will have dedicated time to factor these priorities into other session learnings to set a few focused, high-leverage goals and begin to think about how you will pursue those goals.

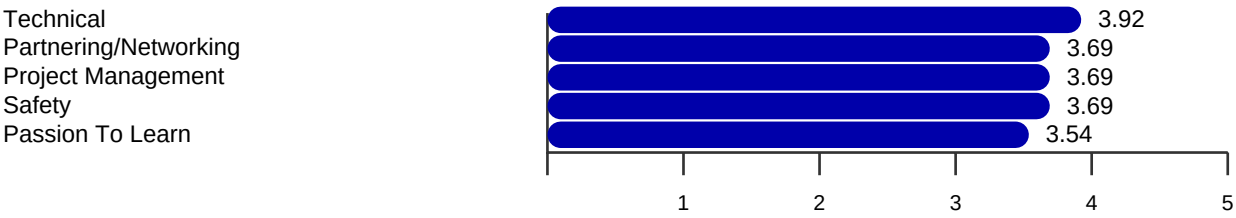

After the sessions, you should work with your coach to work on that pursuit.

You are encouraged to communicate further with your respondents, both to clarify the meaning of the feedback they have given you and to solicit their support on your self-development journey. Even when people have not self-identified, you can conduct general conversations in which you share what you've learned and seek their further feedforward.

Summary

The questionnaire items used in this feedback process asked respondents to rate 5 competencies of leadership and management. Summary scores for each item were calculated by averaging the scores of all your respondents to that item. Your scores for the items in each competency are shown in the bar graph below, with the highest-scored competencies at the top. Your competencies that received the lowest scores appear at the bottom of the graph.

Scores by Competency

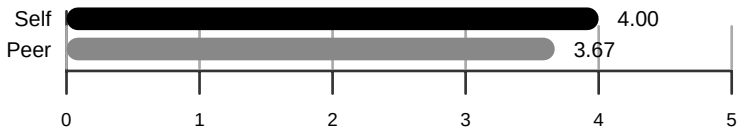

Relationship	Headcount
Self	1
Supvervisor	1
Peers	5
Direct Reports	6

The results in this report are based on responses collected from individuals in different roles. This table shows the number of responses from individuals in different roles.

These different roles provide different perspectives on your behaviors, competencies, and attributes. And, of course, the perspectives of individuals in each role may be unique.

Gap Analysis

The following table graphically displays the "Gap," or difference between your average rating on each competency (labeled "Self") and the average score of all other respondents (labeled "Others") who provided you with feedback. This can help you identify blind spots, or areas where you were rated more favorably by other respondents than by yourself. The Gaps for these competencies are colored in shades of green. Conversely, the graph can also help you identify your opportunities for improvement, or areas where you rated yourself higher than others did. The Gaps for these dimensions are colored in shades of red. The darker the shade of green or red, the larger the Gap. Finally, if a dimension's Gap is not shaded with a specific color, it indicates an area of agreement between yourself and others.

Dimension	How you see yourself and how others see you.	Gap
Project Management		0.75
Partnering/Networking		0.75

Safety

Defintion:

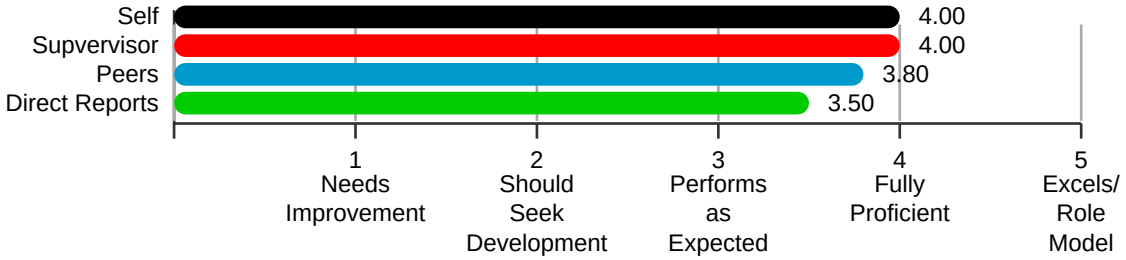

Safety is the integrated practice of leading, developing, and sustaining systems that protect people by aligning roles, processes, and policies with zeroinjury goals while continuously strengthening programs through thoughtful planning and improvement. It requires actively assessing work practices and environments, conducting inspections and audits, and using data, documentation, and communication to identify risks, ensure compliance, and drive corrective action. Safety also depends on building capability--evaluating training needs, providing instruction, modeling participation, and ensuring employees have the knowledge, equipment, and resources to work safely across all conditions, including hazardous materials and emergency scenarios. Ultimately, Safety is a collaborative, organizationwide commitment to preventing incidents, investigating causes, mitigating hazards, and preparing for recovery so that every employee can work in a safe, healthy, and resilient environment.

Why it is important:

Safety, defined as a comprehensive system of leadership, development, analysis, auditing, implementation, communication, training, compliance, collaboration, and continuous improvement, is essential because it protects the most valuable asset any organization has--its people. When companies invest in strong safety practices, they reduce injuries, prevent costly incidents, and maintain stable operations, which directly supports productivity, quality, and organizational resilience. A robust safety system also strengthens trust: employees feel supported, leaders demonstrate accountability, and stakeholders gain confidence that the organization manages risk responsibly. Ultimately, prioritizing safety enables companies to operate ethically, sustainably, and competitively, creating a workplace where people can perform at their best and the organization can thrive over the long term.

Statements for Level:

You ensure all employees handle hazardous materials are properly trained.; I collaborate with safety committees or supervisors to improve PPE compliance.; You create and implement a zero-injury policy.; You identify safety problems.; You develop a safety program for the company.

Partnering/Networking

Defintion:

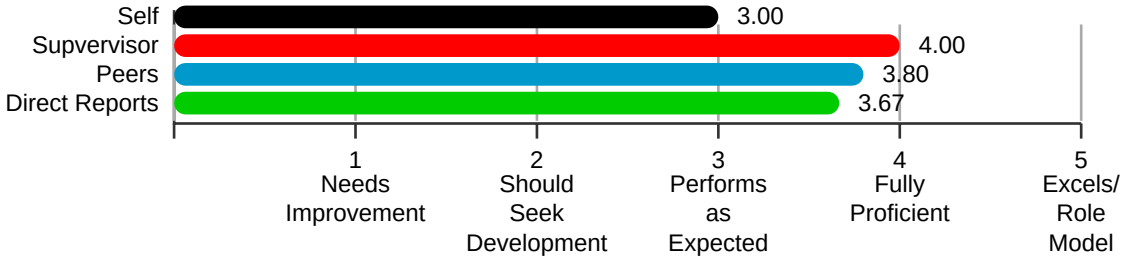

Partnering/Networking is the strategic process of building alliances, expanding professional networks, and forming meaningful relationships to create opportunities and drive collaborative success. It involves aligning resources, exchanging information, fostering mutual learning, and engaging in cross-functional activities to streamline workflow while maintaining trust, commitment, and clear communication. Through effective collaboration, organizations and individuals establish common ground, define agreements, resolve conflicts, and ensure oversight in partnerships that maximize shared strengths and industry impact.

Why it is important:

Partnering/Networking is essential for organizations and companies because it fosters collaboration, drives innovation, and enhances strategic opportunities. By building alliances, expanding professional networks, and forming meaningful relationships, businesses can access new markets, share resources, and exchange valuable industry knowledge. These connections enable organizations to strengthen their competitive edge, optimize workflow efficiency, and ensure trust and commitment in long-term partnerships.
Additionally, effective partnering and networking promote adaptability and resilience by aligning interests, resolving conflicts, and facilitating agreements that support mutual success. Strong partnerships create an ecosystem where organizations can leverage complementary strengths, exchange information, and navigate complex challenges with greater agility. Through continuous engagement with industry leaders, professional associations, and cross-functional teams, companies can anticipate trends, refine strategies, and remain at the forefront of their industries.
Ultimately, organizations thrive when they cultivate relationships built on transparency, mutual learning, and shared goals. Networking unlocks new business opportunities, enhances operational efficiency, and reinforces a culture of strategic collaboration. By embracing partnering and networking as a core function, companies position themselves for sustainable growth, innovation, and long-term success in a rapidly evolving business landscape.
